Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

DETAILED ACTION

Response to Petition

1. Based upon the submitted petition, the examiner notes that the petition is being read as a request for reconsideration.
2. The examiner vacates the previous final rejection and submits a non-final rejection maintaining the 112 rejection.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Claims 1-39** rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In view of the current amendment, the examiner notes that applicant has claimed a system with both a hybrid and speaker microphone coupled to the same driving point (as shown in applicant's figure 7). The examiner contends that this is not an obvious or well known configuration and examiner contends one skilled in the art would not know how to

implement such an interface based on applicant's disclosure. The examiner had previously requested an explanation from applicant (office action filed 12-5-2007) as to exactly how this interface would work.

The examiner notes that applicant has stated that the electrical echo in the claims is not referring to any parasitic coupling at the interface, as such the examiner contends there is no other well known implementation of applicant's Fig. 7 and as such, the parallel processing of applicant's claimed echo canceller would not be able to be implemented.

Response to Arguments

1. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Jamal whose telephone number is 571-272-7498. The examiner can normally be reached on M-F 9AM-6PM.
